NEW QUESTION: 2

An entrepreneur has decided to open an e-commerce site to complement their retail store. After researching their options, they decide that a PaaS solution will be sufficient. To reduce upfront cost, the entrepreneur intends to build the site themselves. Which of the following skill-tests will be needed?

- A. Firewall Administration
- B. Security standard development
- C. Application development
- D. Web-Server Administration

Answer: C

Explanation:

Platform as a service (PaaS) is a complete development and deployment environment in the cloud, with resources that enable you to deliver everything from simple cloud-based apps to sophisticated, cloud-enabled enterprise applications.

PaaS allows you to avoid the expense and complexity of buying and managing software licenses, the underlying application infrastructure and middleware or the development tools and other resources. You manage the applications and services you develop, and the cloud service provider typically manages everything else.

NEW QUESTION: 3

Scenario: A Citrix Engineer has already backed up the XenMobile configuration database. The following is a list, in no particular order, of some of the remaining steps that the engineer must complete to apply a patch to a multi-node, clustered XenMobile Server deployment:

1. Shut down the updated node.
2. Repeat the above steps for each node in the cluster until all nodes have been upgraded.
3. Fail over to secondary node.
4. Update the running node and confirm that the service is running.
5. Start the next node in the cluster.
6. Shut down all but one node.
7. Verify that all nodes are running in the cluster.
8. Update all nodes at the same time.
9. Restore the XenMobile configuration database.

Which six steps must the engineer take, and in which order do they need to be completed, to apply a patch to a multi-node, clustered XenMobile Server deployment?
